

Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	6ab9d3ead083b0e2ee74560a
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Note: this project is built with low-code configuration in ServiceNow, so the checklist below is applied to the catalog item, the flow and the action.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	No source code; Flow Designer arranges the flow steps automatically
2	Proper File Structure	Files and folders are logically organized	Yes	Catalog item, flow and task action are kept as separate components
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Names such as "Standard Laptop", "Optional Software", "Additional software requirements"
4	Function / Method Names	Functions are descriptively named	Yes	Flow "Standard laptop tasks" and action "Create Catalog Task"
5	Code Comments	Inline and block comments explain logic	Partial	Task short description and description are filled; the flow has no description
6	Modular Design	Code is split into reusable functions/modules	Yes	Ordering (catalog item) and automation (flow) are separate
7	No Redundant Code	Duplicate or unused code is removed	Yes	Flow has one trigger and one action only
8	Error Handling	Exceptions and errors are handled gracefully	No	Flow error handler is not enabled yet

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Standard Laptop catalog item	ServiceNow Service Catalog	Can be copied for other hardware items	Medium
2	Optional software variables	Catalog item variables	Can be reused in other catalog items	Medium
3	Flow "Standard laptop tasks"	Flow Designer	Any catalog item that needs a fulfillment task	High
4	Create Catalog Task action	Flow Designer action	Other flows with a different group or description	High
5	Hardware group catalog task	Catalog Task [sc_task]	Any hardware fulfillment request	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Clear, separate components with descriptive names
Readability	4	Simple flow with one trigger and one action
Reusability	4	Flow and action can be reused for other catalog items
Documentation / Comments	3	Flow description and comments can be added
Overall Score	3.8	Good for a first version; error handling and descriptions to follow
