

Solution Architecture

Date	29 September 2026
Team ID	SWTID-2026-1410
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	5 Marks

Solution Architecture Diagram:

The diagram shows the high-level architecture of the laptop ordering solution across the Presentation Layer, the Service Catalog and Flow Designer layers, and the Data Layer.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Where the employee browses the Service Catalog, opens the Standard Laptop item, selects optional software and places the order. Shows the order confirmation with the request number.	ServiceNow Service Catalog, web browser
Service Catalog Engine (in place of API Gateway)	Receives the order, creates the request and requested item, and fires the Service Catalog trigger that starts the flow.	ServiceNow Service Catalog, catalog item Process Engine link
Flow Designer (in place of Microservices)	Runs the flow "Standard laptop tasks". Its Create Catalog Task action creates a task for the Hardware group with the description "Laptop need to Configured".	Flow Designer / Workflow Studio

Component Name	Description / Role in Architecture	Technologies Used
Authentication & Roles	Makes sure only logged-in users order laptops and only the Hardware group works the task.	ServiceNow login, roles and ACLs
Database	Stores the catalog item, the request and requested item, and the catalog task with all their links.	ServiceNow tables (sc_cat_item, sc_request, sc_req_item, sc_task)
