Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Request	Stage 2: Processing	Stage 3: Fulfillment
Actions <i>What does the customer do?</i>	- Opens the Service Catalog and goes to Hardware - Selects Standard Laptop - Ticks optional software and clicks Order Now	- Sees the confirmation and the request number - Checks the request status - Waits for the laptop to be prepared	- Receives the configured laptop from the Hardware team - Confirms the request is complete - Starts using the laptop
Touchpoint <i>What part of the service do they interact with?</i>	- Service Catalog home page - Standard Laptop catalog item page - Order Now button	- Order Status page (request number) - Request record (Pending Approval) - Requested Item record	- Catalog task (SCTASK) worked by the Hardware group - Request record status - Laptop handover
Customer Thought <i>What is the customer thinking?</i>	"Where do I order a laptop?" "Is this the right laptop for me?" "I hope my order goes through."	"Did my request go through?" "Has anyone started working on it?" "How long will it take?"	"Is my laptop ready yet?" "I hope it is set up properly." "The process was easy."
Customer Feeling <i>What is the customer feeling?</i>	Curious and hopeful; relieved when the request number appears	Slightly impatient while waiting; reassured that a task exists	Satisfied when the configured laptop is received
Process Ownership <i>Who is in the lead on this?</i>	Employee (Requester) and the Service Catalog	Flow Designer flow "Standard laptop tasks"	Hardware group (IT team)
Opportunities <i>How can we improve this stage?</i>	- Add more standard laptop models to choose from - Show clear specs and price on the form - Add mandatory fields where needed	- Add a manager approval step in the flow - Send an email when the task is created - Show live status to the requester	- Send a notification when the laptop is ready - Auto-close the request after the task closes - Report on delivery time
