

Performance Testing

Date	29 September 2026
Team ID	[Enter Team ID]
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Manual test through the ServiceNow Service Catalog; timing taken from the request and catalog task timestamps (no load-testing tool such as JMeter was used)
Type of Testing	Single-user response-time test (order to fulfillment task creation)
Target Module / API	Standard Laptop catalog item and the Flow Designer flow "Standard laptop tasks" (Service Catalog trigger and Create Catalog Task action)
Test Environment	Cloud: ServiceNow Personal Developer Instance (dev277579)
Test Date	28 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Order the Standard Laptop (no optional software) from Service Catalog > Hardware > Standard Laptop	1	Not timed	Request REQ and item RITM created; confirmation with request number shown
2	Flow "Standard laptop tasks" creates the catalog task after the order	1	82 (approx.)	Catalog task assigned to the Hardware group created within 2 minutes
3	Several employees order laptops at the same time	Not performed	-	Planned for future testing
4	Peak load: many orders in a short time	Not performed	-	Planned for future testing

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg): order to task creation	< 2 minutes	82 seconds (1 order)	Pass	Order placed 23:30:49, task created 23:32:11
2	Response Time (Max): order to task creation	< 5 minutes	82 seconds (1 order)	Pass	Only one order was tested
3	Throughput (Req/sec)	-	Not measured	N/A	No load tool used
4	Error Rate	< 1%	0% (0 errors in 1 order)	Pass	REQ, RITM and SCTASK all created
5	CPU Utilization	< 80%	Not measured	N/A	Not visible on a hosted developer instance
6	Memory Utilization	< 80%	Not measured	N/A	Not visible on a hosted developer instance

Step 4: Observations & Analysis

Key Findings:

A test order for the Standard Laptop (REQ0010001) was placed at 23:30:49 and the flow created the catalog task SCTASK0010001 at 23:32:11, about 82 seconds later. The task was assigned to the Hardware group with Approval set to Approved, and no errors occurred.

Bottlenecks Identified:

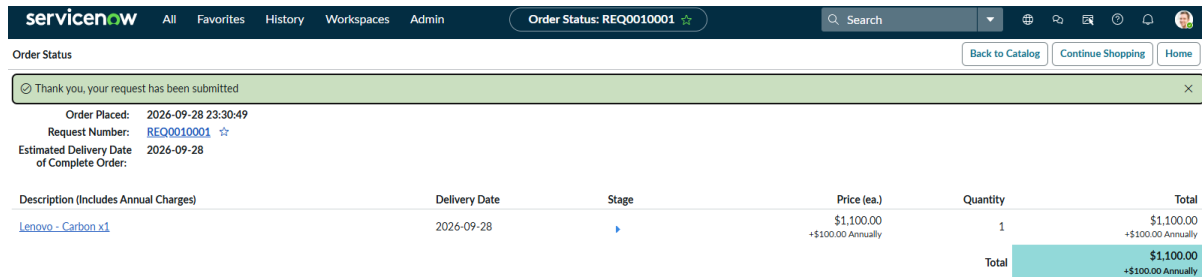

No bottleneck was found in this single-order test. The roughly 82 second gap is the time the platform took to start the flow after the order. Load with many users, CPU and memory could not be measured on the hosted developer instance.

Optimization Steps Taken:

None were needed. The flow was kept simple, with one trigger and one action, to keep processing quick. A load test with several concurrent orders is planned as future work.

Step 5: Screenshots / Evidence

Screenshots of the test order and its results (order confirmation, request record and the catalog task created by the flow):

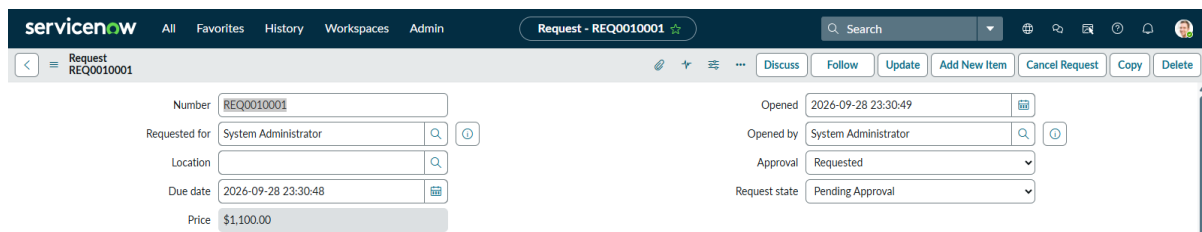

Order Status

Thank you, your request has been submitted

Order Placed: 2026-09-28 23:30:49
 Request Number: REQ0010001
 Estimated Delivery Date of Complete Order: 2026-09-28

Description (Includes Annual Charges)	Delivery Date	Stage	Price (ea.)	Quantity	Total
Lenovo - Carbon x1	2026-09-28		\$1,100.00 +\$100.00 Annually	1	\$1,100.00 +\$100.00 Annually
Total					\$1,100.00 +\$100.00 Annually

Screenshot 1: Order placed at 23:30:49, request number REQ0010001

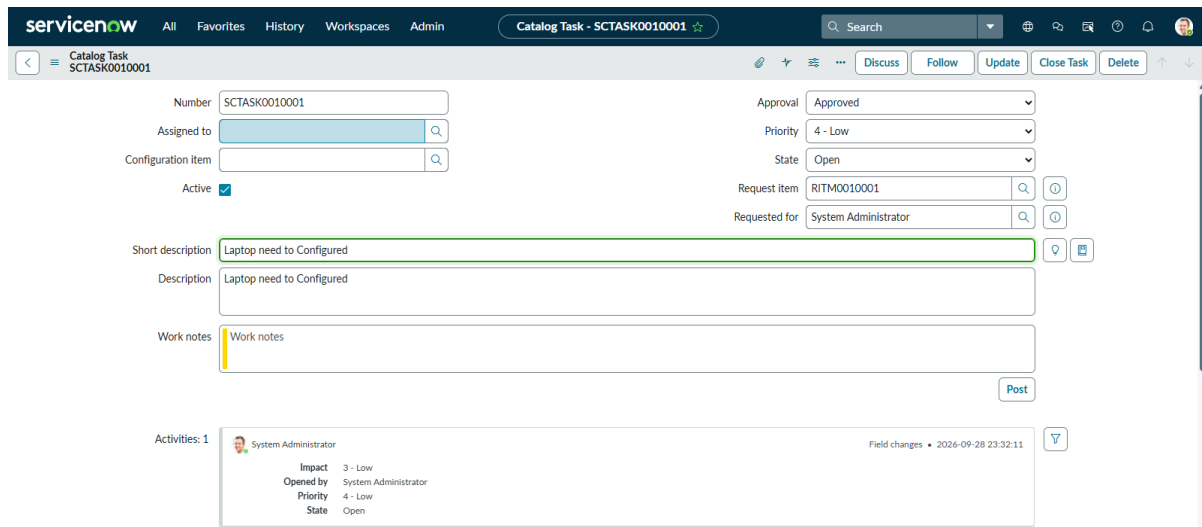

Request - REQ0010001

Number: REQ0010001
 Requested for: System Administrator
 Location:
 Due date: 2026-09-28 23:30:48
 Price: \$1,100.00

Opened: 2026-09-28 23:30:49
 Opened by: System Administrator
 Approval: Requested
 Request state: Pending Approval

Screenshot 2: Request REQ0010001 opened at 23:30:49

Catalog Task - SCTASK0010001

Number: SCTASK0010001
 Assigned to:
 Configuration Item:
 Active: ☒

Approval: Approved
 Priority: 4 - Low
 State: Open
 Request item: RITM0010001
 Requested for: System Administrator

Short description: Laptop need to Configured
 Description: Laptop need to Configured
 Work notes: Work notes

Activities: 1
 System Administrator
 Impact: 3 - Low
 Opened by: System Administrator
 Priority: 4 - Low
 State: Open
